Stringent Money Conditions Abroad Are Reflected on New York Exchange.

NOTE-All Market news on . this page reflects closing sale prices (unless buy or bid be specified) on Saturday, March 8

New York, N. Y., March 8 .- The stock market closed weak. In common with he other greater financial markets of the world, the home market showed weakness today, owing to the strin-cent money conditions abroad, especi-

gent money conditions alroad, especially in Berlin.

Efforts to obtain funds here to releve the pressure abroad, tending toward a reduction of loanable capital a this market, furnished ammunition for the bears, who raided the list charply. In addition to misgiving over the money market outlook, discussions was felt over the uncertain status of the Harriman dissolution plan and the possibility of further government units against large corporate interests. Prices of stocks gave way abruptly. High grade investment issues went lown in almost the same precipitate inshign as speculative favorites.
